WORK EXPERIENCE

Software Engineer at 100devs, remote

January 2022 — Present

- Collaborated with a team of developers to build modern and responsive web applications using best practices
- Built semantically structured full stack web applications
- Applied agile methodologies like SCRUM for project management

Recent Projects:

Radical Readers (Fullstack Web App) – Social media app for book lovers. Users can login to their profile and organize data on their accounts. Uses Google Books API to receive data on their favorite books and store them in their list of anticipated reads. Users may socialize with other book enthusiasts, write blogs, and post reviews on books they have recently read.

Shifty (Fullstack Web App) – All-in-one app where restaurant managers can handle important tasks like organize shifts, payroll, provide instruction and memos, and handle inventory. Team members can view payroll info, manage and view schedule information, and more.

Other Projects: Phoenix Cosmolovers Society APOD Web App with NASA API integration, On-demand background color changer for Partnered Twitch streamer, and many more
